-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The disclosure is objected to because of the following informalities:
 - Page 1, line 6, change “the, register mark accurate” to --the register mark accurately--.Appropriate correction is required.

Claim Objections

3. Claims 1, 7 and 8 are objected to because of the following informalities:
 - Claim 1, line 1, change “the” (second occurrence) to --a--.
 - Claim 1, line 2, change “accurate” (first occurrence) to --accurately--.
 - Claims 7 and 8, lines 4-5, “printing organ”, “transfer organ” and “illustration organ” are unclear.
 - Claims 7 and 8 recite the limitations “the print layout” in line 6. There is insufficient antecedent basis for these limitations in the claims.Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2852

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 2, 7 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Dreher et al. ['857]

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Dreher et al., an applicant's cited prior art, disclose a color image forming apparatus [1] comprising controllers [7, 7'], a conveyor belt [12] for transporting printing substrates [5], toner fields [3, 3'], registration marks [8, 8'], registration sensor [17], position detecting element [18], stored data [19], and correction factors [Claim1] suitable for correction of the calibration of the register mark [Col.5, line 29 to Col. 6, line 37].

The claimed method steps are inherent from the product structure.

Allowable Subject Matter

6. Claims 3-6 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2852

Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Metzler et al. ['635] disclose a method and control device for preventing register errors.
- Regimbal et al. ['456] disclose printer calibration system and method.
- Metzler ['295] discloses method and illustration device for register mark setting.
- Burkes et al. ['997] disclose methods for generating a calibration product for an image producing device.
